Re: WHO Health Alerts Brings COVID\_19 Facts to Billions Via *WhatsApp*

In an effort to help ensure people remain informed and have access to information in as timely a fashion as possible, the World Health Organization (WHO) has launched a dedicated messaging service available in *Arabic, English, French, Hindi, Italian, Spanish and Portuguese* via WhatsApp and Facebook.

The ease-to-use messaging service has the potential to reach 2 billion people and improves the WHO's ability to get information into the hands of the people that need it most.

This service will be used to provide the latest news and information on the Coronavirus (COVID-19), including details on symptoms and how people can protect themselves and their loved ones. It will also provide access to the latest situation reports and numbers, "in --real-time" to help government decision makers protect the health of their populations.

This service can be accessed by a link that opens a conversation in WhatsApp. Users can simply type "hi", "hola", "oi", "नमस्ते", "مرحبا" or "Ciao" to activate the conversation, prompting a menu of options that can help answer your questions about COVID-19.

The WHO's Health Alerts on WhatsApp are currently available in the following languages:
